Subject: DAA for OECA

Larry, Patrick Traylor, currently a partner at Hogan and Lovells, will join EPA June 5 as the DAA for OECA.

I'll be at the G7 when he arrives, but I have advised Patrick that I've asked you to organize the OECA staff to brief Patrick on OECA operations and activities to bring him up to speed. Patrick has been practicing in environmental law for nearly 20 years, so I don't believe an overview of OECA is necessary. Rather, I would like OECA and you to provide him with briefing to advise him of the informational tools OECA uses to advise you and other top staff of OECA cases and investigations so Patrick is able to advise the Administrator on cases when necessary.

Additionally, I have made Patrick aware that the Administrator would like regularly briefed on the top enforcement cases OECA is pursuing and referring to DOJ. Likely a number would be criminal cases. I think this provides Patrick a good opportunity to convey information to the Administrator.

Thank you for your help.

Ryan.

Subject: RE: Susan Bodine
Importance: High

Larry,

Thank you for the briefing book—Nathaniel dropped it off earlier. EPW is working to hold a confirmation hearing for Susan the week after Memorial Day recess.

Given the short timeline, and to give Susan what she needs, I ask for OECA to:

1. Written Testimony (no later than **Wednesday, May 31**, so it can be cleared through OMB)
2. Facilitate a Murder Board (target date of **Thursday, June 1 or Friday, June 2**).
 - a. OCIR will help rope in the appropriate staff from OP, OPA and others.
 - b. OCIR will also work to identify questions that may arise from the confirmation hearing

Many thanks for your assistance in pulling this together. Please let me know if you wish to discuss further.

Troy,

We are collecting information in response to your request, and it falls into three categories:

1. Information available to the public (e.g., materials on the website).

Ex. 5 - Deliberative Process

We are preparing a binder with all three categories of materials, and we can discuss which ones you'd like to share. Let us know if that works.

Subject: Susan Bodine

Lawrence,

I hope this email finds you well.

As you know, Susan Bodine has been nominated by President Trump to serve as the AA for the Office of Enforcement and Compliance Assurance. OCIR will lead the Susan's confirmation process; however, we will work closely with OCEA to assist.

One of the first steps we need to do is to compile a briefing book for Susan. There will be many components and I will need your team's help in compiling information regarding OCEA; specifically:

1. Background/Mission of OCEA
2. Highlights/Hot Spots for OCEA
3. Delegations and lines of authority from regions to HQ
4. Some regional counsel report to oeca and some to OGC
5. State review framework info
6. NPM guidance
7. Enforcement priorities

I appreciate your assistance in this process and look forward to working with you.

Subject: Re: Enbridge Energy LP Application for Presidential Permit

Sure thing. There was a near miss on one of these earlier in the year based on handling in one of the regions - thanks to OECA's efforts, we avoided needless escalation. Rob Tomiak, director of the Office of Federal Activities in OECA, then worked to figure out a standard process for responding to - or at least coordinating the response to - national interest determinations. I was not part of discussions, but the result was that OEX was asked to start assigning them to OP with copies to other offices as appropriate. If you feel that OP is not the right office to coordinate these responses, let me know, and we can assign them differently. Thanks.

Thank you. I will speak to Carolyn, that is unacceptable.

Is it usual practice for Office of Policy to respond to these letters on pipeline permitting? If so we're happy to take it, but it struck us as unusual.

Samantha -

Below is a screen shot of the history on this control (AX-17-000-6848). Per my office's previous conversations with OECA on the handling of national interest determinations, this memo was assigned to OP on March 29. It sat until April 13, when Carolyn Inge accepted the assignment. She then requested reassignment to OECA on

April 19. OECA quickly requested that the control be sent back to OP, and the reassignment was made on April 21. Carolyn accepted the assignment on April 24, and it looks like it has been with you all since then. Please let me know if you need anything else. Thanks.

- Brian

Subject: FW: Enbridge Energy LP Application for Presidential Permit

Larry and Brian:

I just had a chance to look at this memo about Enbridge's application for a Presidential Permit on the US-Canada border. It looks like the memo from State to EPA is dated March 28, 2017. The letter is addressed to Brian Hope - My staff told me that OEX routed this to OECA, and that you all had this letter and request by State for an EPA response, and just last week referred it to Office of Policy to respond. Why would this have sat with no response for almost two months?? The memo requests responses ASAP, so this is not good that we have had this for so long without responding.

Thanks in advance for any knowledge you have on this matter.

Samantha

Subject: RE: Clean Air Agencies grants

Hi Ryan –

Thank you for your note. This is an issue we have had a number of recent conversations about and on which we believe we have a way forward. You are correct that for many years, EPA has funded a grant to facilitate a way for states who choose to pay dues to NACAA to be able to do so without having to pay matching funds. While it is EPA policy to promote competition in the award of assistance agreements to the maximum extent practicable, EPA does have an exemption to the assistance agreement competition policy for awards to co-regulator organizations funded by the STAG categorical appropriation based on the associated program cost authority. To date, NACAA has been the sole co-regulator organization funded under this exemption. As you mentioned, there is now another national state air organization.

Last fall, AAPCA submitted an unsolicited proposal to EPA. OAR consulted with the General Counsel and grants office and determined that: 1) AAPCA's proposal did not meet the criteria for unsolicited grants; but also that 2) it would be defensible for the agency to make awards to two different co-regulator organizations under the exemption to provide states with the same option for paying their dues without a match to either national organization. As has been the case with NACAA, the grant would be funded at levels commensurate with the number of individual states requesting to pay their dues this way.

On May 19, my staff had a productive conference call with Clint Woods, Jason Sloan, and Heath Huddleston from AAPCA to explain why their previous unsolicited proposal was not accepted, and to

discuss the process and requirements for resubmitting their workplan and budget proposal to achieve a similar arrangement for paying dues that has existed for NACAA members. My staff expects to hear back from AAPCA in early June once AAPCA has time to incorporate additional details into their workplan and budget proposal.

We plan to touch base with NACAA to advise them of the potential for an additional award to a national co-regulator organization in the next couple of weeks.

Please let me know if you have any additional questions.

Sarah

Subject: Clean Air Agencies grants

The Agency has long provided funding to the National Assn of Clean Air Agencies off the top of CAA grants which state environmental departments receive. Are there other entities which receive automatic funding off the top of states' grants like the NACAA receives from us?

I know this is a long standing practice which NACAA has received since it was STAPPA, but there are competing non-profits with NACAA at this point and with budget cuts of some kind coming states should have the opportunity to individually choose how they use their grant funding from us and not feel obligated to provide it to any recipient in particular. If states choose to provide dues to NACAA, it should be their call after receiving their grants from us.

Will you let me know how best to accomplish this and to advise NACAA of the change in our practice or arrangement with it?

Thanks

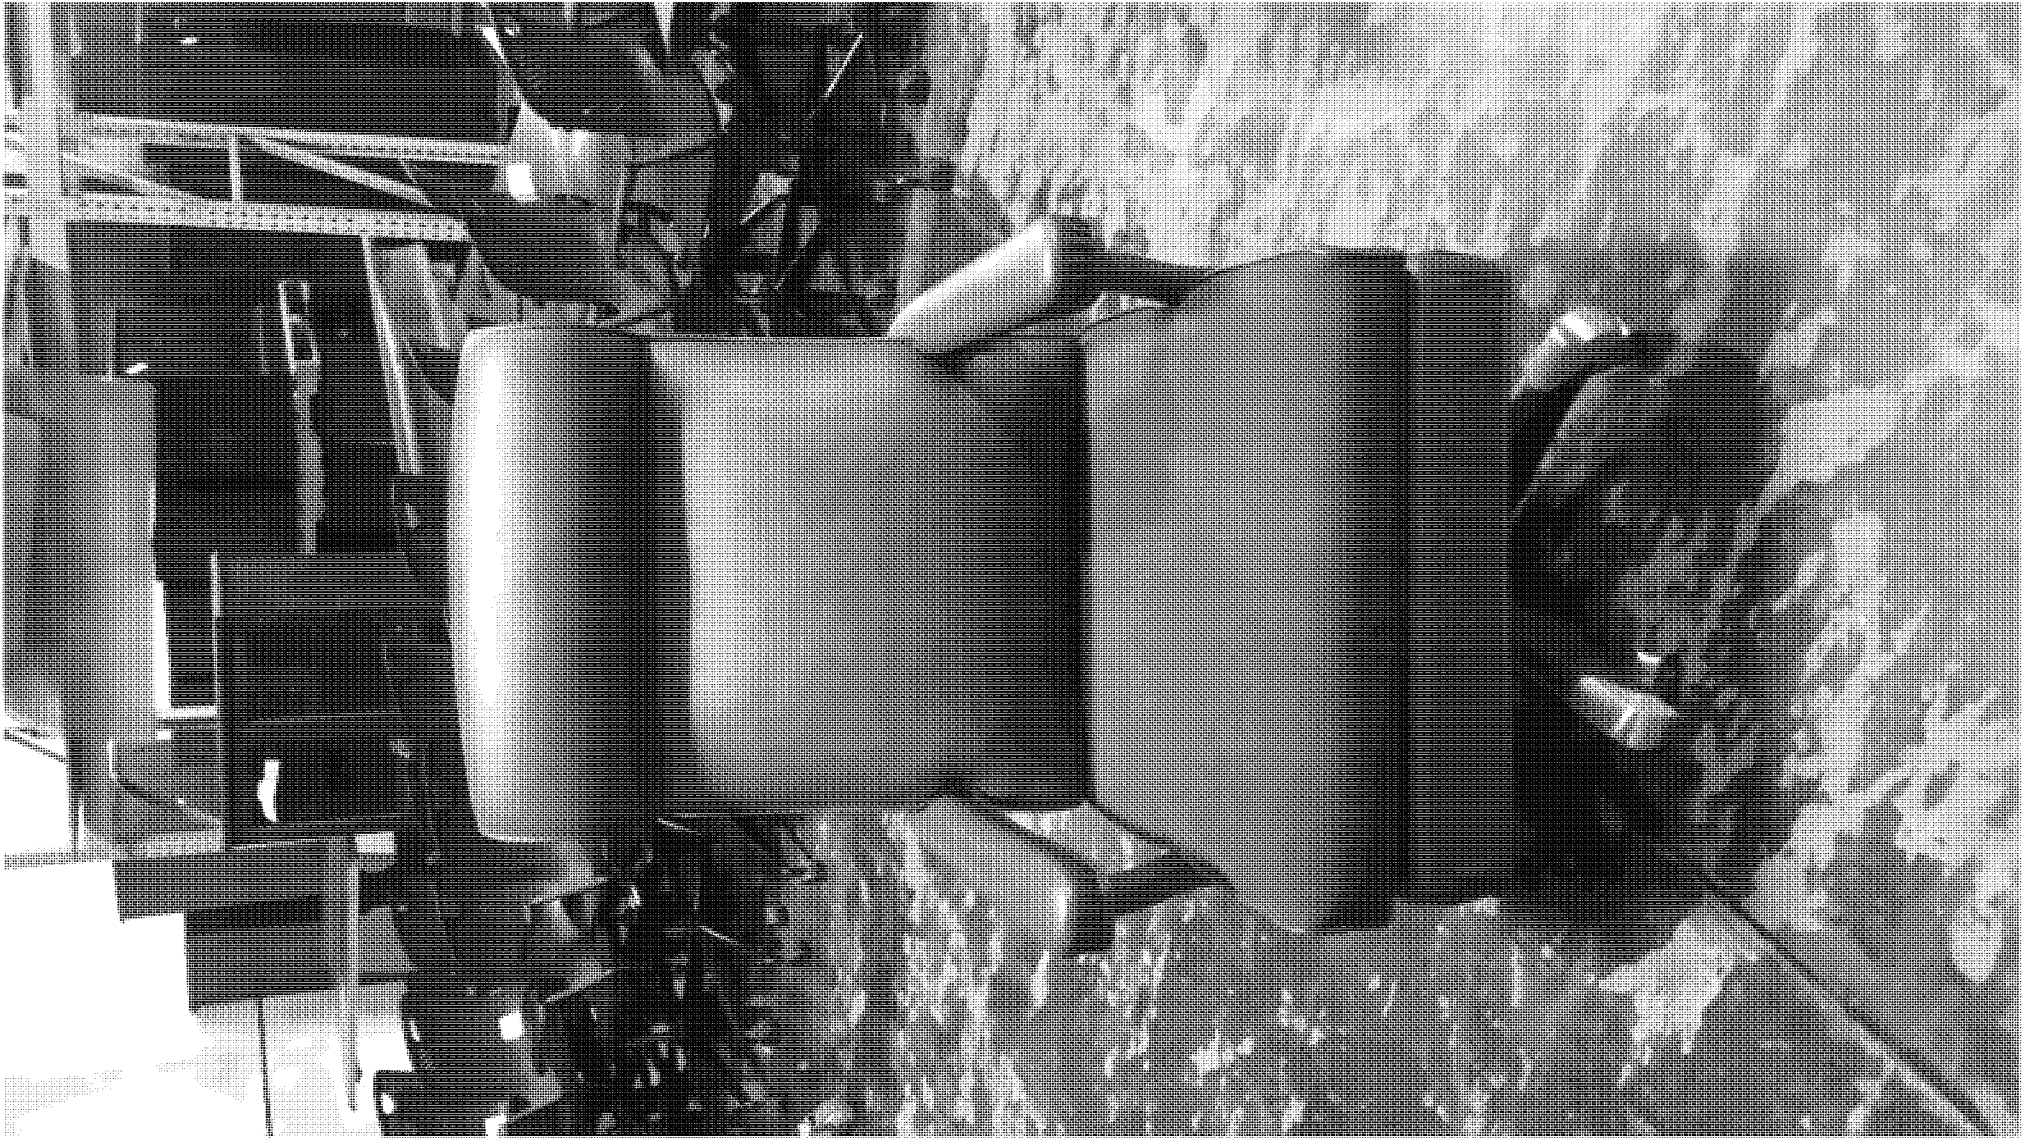

Ryan Jackson

Hi Ryan – here are the options my staff found in the warehouse. 3 chairs – last 3 pictures are of the chair that may work. A new chair similar to the one he is using is \$2K.

Attachments: NonProfits STAG.XLSX

Ryan and John,

The Grants office researched all the non-profits that receive STAG funds. Attached is a chart. Those highlighted in yellow use the STAG funds to facilitate paying state dues to the organization. We still have a very few outstanding questions, so I may need to update this next week. I didn't want to wait any longer to get this to you.

Please let me know if you have questions.

[illegible]

Erroneously identified as a non-profit - since corrected to be a Quasi-governmental entity that operates under the supervision and control or as an agent of a general purpose unit of local government and which is eligible for the Brownfields Revolving Loan Fund agreements under CERCLA § 104(k)(1)(B) and CERCLA § 104(k)(3)(A)(i). It was as a "Quasi-governmental Entity" that SLDC applied in its December 2003 proposal under the FY04 Brownfields Competition, and, it was the "Quasi-Governmental" status that was appropriately evaluated for threshold eligibility.

Awarded competitively

Incorrectly listed as non-profit; actually a state entity

Media	Notes
Research	Awarded competitively
Research	The AAPCO/SFIREG grant has a public interest exception to the Competition Policy, and we obtained the consent of the states to use categorical STAG funding for the grant through AAPCO, which serves as a representative body for state lead agencies. State lead agencies, which are co-regulators, comprise SFIREG's membership
Water	Funded with STAG funds through a competitive grant award process and was not part of state categorical grant funding or allocation process. The grant was competed among eligible nonprofit organizations (including universities) using CERCLA 104(k)(6) which allows the program to fund research, training and technical assistance to facilitate the inventory of brownfield sites, site assessments, remediation of brownfield sites, community involvement, or site preparation.
Water	
Water	
Water	
Water	The allocation comes from the prior year – e.g., in computing the dues for each state for FY 18, the allocation in the computation would be from FY 17. (Calculation) Add them up and divide by the (105) allocation for each State, then multiply that % by \$250K to get dues. Once the dues are calculated for Region 6, letters are sent to each state requesting consent to pull dues off their allocation.

Water	The funding is a line item in legislation. NADB is not considered a non-profit. It is a bi-national (international) organization and is exempt from competition requirements. EPA Order 5700.5A1 – Policy for Competition of Assistance Agreements exempts "Assistance agreement awards to Foreign Governments (and instrumentalities and agencies of the foreign government as determined by the law of that country) and to United Nations agencies and similar International Organizations, such as the Organization of American States and the Organization for Economic Cooperation and Development (OECD), for international environmental activities." The State Dept. lists NADB as an international organization.

Water	Awards STAG funds to Northeast States for Coordinated Air Use Management (NESCAUM) to work collaboratively with its constituent member states on air quality control and management activities. NESCAUM conducts technical studies, demonstration projects, exchange of information, outreach, and air quality training programs for its member states to more efficiently perform their primary duties implementing the requirements of the Clean Air Act. The NESCAUM STAG dollars cover dues from 4 states with their concurrence to redirect a portion of their 105 funds to NESCAUM. The other two states pay their dues directly to NESCAUM.

Air	
Air	Erroneously identified as a non-profit - since corrected to be a Quasi-governmental entity that operates under the supervision and control or as an agent of a general purpose unit of local government and which is eligible for the Brownfields Revolving Loan Fund agreements under CERCLA § 104(k)(1)(B) and CERCLA § 104(k)(3)(A)(i). It was as a "Quasi-governmental Entity" that SLDC applied in its December 2003 proposal under the FY04 Brownfields Competition, and, it was the "Quasi-Governmental" status that was appropriately evaluated for threshold eligibility.

RFS Administrator Briefing - 5 26 17.docx
QA on RFS RIN System 5 26 17.docx

Ryan,

My office worked closely with OAR's Office of Transportation and Air Quality to prepare the two attached papers on RINs: a briefing paper on the Renewable Fuels RINs market, and a Q & A document on the RFS RIN System. The papers touch on issues associated with the administration of the RINS program, fraud, prosecutions, and issues related to speculation in the RINS market.

Please let Sarah Dunham and me know if you need additional information, or would like to set up a briefing for the Administrator.

Larry

Ryan,

Staff from the relevant offices are working on a briefing paper on the RINs program, and we should have it to you by the end of the week.

Q&As on the RFS RIN System

5/26/17

How was the RFS compliance system established?

- The EPA's RFS program regulations were developed in collaboration with refiners, renewable fuel producers, and many other stakeholders, and were designed to allow for effective compliance with Congress's ambitious renewable fuel volume targets without forcing widespread changes in company ownership or activities.
- Central to the program's design are Renewable Identification Numbers, or RINs. A unique RIN is generated by the renewable fuel producer for each gallon of a qualifying renewable fuel under the program.
- RINs are used by refiners and importers to demonstrate compliance with congressionally mandated annual volume requirements.
- RINs are tradeable to allow the RINs generated by renewable fuel producers to be used by refiners and importers.

What purpose do RINs serve? Are RINs required by the statute?

- The statute requires a credit system. Under the RFS program, those credits are RINs.
- RINs serve two statutory purposes: providing a general mechanism to implement the program, as well as fulfilling the statute's requirement for a credit program under 211(o)(5) that allows for the banking and trading credits resulting from over-compliance.
- The RIN system provides a mechanism for parties who do not produce renewable fuel to demonstrate compliance with the renewable fuel mandates.

How does EPA keep track of RINs?

- EPA developed and implements an electronic tracking system called the EPA-Moderated Transaction System, or EMTS.
- All RIN transactions are entered by regulated parties in EMTS. Transactions include RIN generation by renewable fuel producers, RIN sales and purchases, and RIN retirements by obligated parties and exporters of renewable fuels.
- EMTS is similar to a bank in that each registered regulated party has an account for RINs that they own.

Who can generate a RIN? Who can own a RIN?

- Only registered producers and importers of a qualifying renewable fuel can generate RINs.
- Any party that registers and meets the recordkeeping and reporting requirements of the RFS program can own RINs, though in practice the vast majority are owned by renewable fuel producers and obligated parties at any point in time.

Who can trade RINs? Are there any restrictions on who can trade RINs?

- Any party that registers and meets the recordkeeping and reporting requirements of the RFS program can own and trade RINs.
- Aside from meeting the programmatic requirements for registration, recordkeeping and reporting, there are no restrictions on who can trade RINs.

Why is RIN trading open to entities other than producers and obligated parties?

- On the advice of various government economists and multiple industry participants, the RFS regulations allow brokers to participate in the market to help facilitate trading and make the market more liquid. The data available to EPA in EMTS show that the majority of RINs are owned, held, and traded by renewable fuel producers and obligated parties.

Could trading of separated RINs be limited to only obligated parties and renewable fuel producers?

- In the preamble to the proposed RFS regulations, the agency took comment on a direct transfer approach that would require obligated parties to purchase RINs directly from renewable fuel producers, and eliminate any middlemen. The EPA received negative comments on this option and did not implement this approach. Currently some RIN brokers serve the market by purchasing separated RINs from small fuel blenders and retail operators aggregating the RINs into larger blocks for sale to obligated parties. In the past small biofuel operators have expressed concern that without this function they couldn't market RINs to large obligated parties. At minimum, it would increase obligated party RIN trading costs as they would need to seek out more small RIN transactions with a larger number of small counter parties rather than relying on brokerage firms to manage RIN trading with the small players in the biofuels market. Although the direct transfer approach would decrease market liquidity, it would also facilitate due diligence by obligated parties, and may reduce the amount of fraud.

Would such changes help reduce market volatility?

- We don't believe so. We currently have an open market that maximizes participation and helps with market liquidity and keeps RIN prices competitive. Our observations of market volatility (or price spikes) in the past indicated that volatility was related to approaching the ethanol blendwall (the maximum quantity of ethanol that can be sold each year given legal or practical constraints on how much can be blended into each gallon of motor fuel) and policy changes that reduced market certainty and impacted long-term business investments.

On what exchange are RINs traded? Can RINs be traded elsewhere?

- RINs are traded directly between buyers and sellers, sometimes with the assistance of a broker or consultant. Both buyers and sellers report their trades in EMTS and actual RINs are transferred when buy/sell pairs are matched and the corresponding parties agree to the trade.
- The Chicago Mercantile Exchange at one point added RIN futures to their market, though we understand RIN futures contracts trading is negligible. However, only contracts for RINs rather than actual RINs are traded. All RIN transactions must be reported through EMTS.

Is RIN trading information publicly available?

- Details of RIN transactions are not publicly available since they are treated as information claimed as Confidential Business Information (CBI).
- Aggregated RFS data including RIN generation and total RINs available are posted on our website at <http://www.epa.gov/otaq/fuels/rfsdata/index.htm>.
- We are examining ways to increase the non-CBI information that can be shared with the public.

How could I find out what the current price of a RIN is? Does EPA supply that information to the public? If not, why not?

- Price is one of the transactional elements reported to EMTS. However, details of individual RIN transactions are not publicly available since they are treated as information claimed as CBI.
- RIN prices reported to EMTS include prices for long-term contracts, which may not be aligned with spot market prices reported by third-party sources. Some reported prices in EMTS reflect an arbitrary distinction between the fuel value and the RIN value when they were purchased together, making the RIN values fall outside of the price range that appears reasonable, and may not be as reliable.
- RIN price information is available through third-party sources. Some brokers post RIN price information on the web and organizations such as the Oil Price Information Service (OPIS) provide price data commercially.

How much of the volume of RIN trades is driven by market participants that aren't producers or obligated parties? How many of these traders are there?

- The RIN trading program was created to allow obligated parties and non-obligated parties the opportunity to participate in the RIN market. This was determined as part of the 2007 rulemaking, after notice and comment, as an additional flexibility to the system and as a way to mirror how the renewable fuel markets had and continue to operate outside of the RFS.
- Non-obligated parties allowed to trade RINs can be any individual or company so long as they register with EPA and meet the registration requirements. There are more than 800 companies registered with EPA either producing or holding RINs in 2016. Of the more than 800 companies, fewer than 35 were neither a fuel producer nor a fuel blender (i.e., were parties that don't have an obvious direct function in the market).
- Some of these fewer than 35 companies are service companies providing RIN management and sales functions for small producers. Others are brokers or investors. When last we looked, in aggregate, these companies had purchased or held a very small percentage of RINs generated (in 2013, this group of companies held less than 1% of RINs generated in 2013).

Why doesn't the RFS program work like Acid Rain, or other fuel programs, where only the obligated party can generate the "allowance" or "credit"?

- Many other programs, such as the acid rain program, rely on changes made by the obligated parties (such as additional pollution control or other capital investments) to generate allowances or credits. The RFS program is more complicated in part because the fuels marketplace is more complicated (with many different parties playing a role) and in part because renewable fuel use is determined by parties (retail stations and consumers) who are not subject to compliance obligations.
- To reduce disruption and compliance costs, we allowed credits (RINs) to be generated by the parties that were already producing renewable fuel, and then separated by parties that were already blending renewable fuel with gasoline or diesel. This structure allows obligated parties to comply with the RFS standards at a lower cost and with minimal disruption to the fuels market.
- Obligated parties still retain the option of purchasing renewable fuel production facilities and/or blending facilities if they choose to do so.

What steps has EPA taken to ensure market transparency and RIN validity?

- Several types of data related to RFS program implementation are currently available to the public, and EPA is currently looking at ways to further increase transparency in the RIN market. EPA currently publishes on its website data including total renewable fuel and RIN production to date, monthly renewable fuel/RIN production, RIN retirements, RIN separation, total RINs available, and aggregated general compliance information. From this information, obligated parties can track the renewable fuels market to project if the volume of RINs generated is consistent with the volume of renewable fuel likely required under the applicable percentage standards.
- With respect to the validity of RINs, EPA seeks to ensure the validity of RINs through a number of methods, including registering renewable fuel producers and importers before they can generate RINs, requiring producers to undergo a third-party licensed engineering review of their production facility prior to registration, and annual third-party audits of their records to ensure the volume of RINs generated and fuel produced/imported match. EPA has also implemented a comprehensive voluntary Quality Assurance Program that provides additional tools for ongoing oversight of renewable fuel production and RIN generation.
- Producers and Importers of renewable fuel face potential criminal and civil penalties if they fail to appropriately meet the program requirements. The EPA and the Department of Justice have successfully prosecuted fraudulent RIN producers in the biodiesel sector.

Importance: High

Ryan,

Attached is the proposed FR notice for the Postponement of Certain Compliance Dates for the Effluent Limitations Guidelines and Standards for the Steam Electric Power Generating Point Source Category.

It is my understanding that the Administrator wants this signed today, so it can be the Federal Register by Tuesday. In order to meet that deadline, it needs to be signed and returned to OFR by 11am today.

Do you authorize autopen?

Thanks.

Derek

Adding Byron and Sam.

On May 22, 2017, at 7:51 AM, Burden, Susan <Burden.Susan@epa.gov> wrote:

Hi Ryan,

The FRN announcing a 90-day administrative stay of the final rules “Standards of Performance for Municipal Solid Waste Landfills” and “Emission Guidelines and Compliance Times for Municipal Solid Waste Landfills” is ready for Administrator Pruitt’s signature. The notice must publish in the Federal Register by May 26, because there is currently a May 30 deadline for states to submit plans in accordance with the emission guidelines. To publish by May 26, Administrator Pruitt needs to sign no later than 9 am this morning (Monday, May 22).

Please let me know if you concur and approve the use of autopen this action. Also, please let me know if you need any additional information.

Background

By a letter (attached) dated May 5, 2017, the Administrator announced the convening of a proceeding for reconsideration of certain requirements in the final rules, "Standards of Performance for Municipal Solid Waste Landfills" and "Emission Guidelines and Compliance Times for Municipal Solid Waste Landfills," both published on August 29, 2016. In this action, the EPA is administratively staying both rules in their entirety for 90 days pending reconsideration.

Thanks,

Susan

Subject: RE: Clean Air Agencies grants

Well, but I'm not sure that this accomplishes what I was raising. With state grant levels possibly being cut, states should have the opportunity to contribute to whatever national organization they choose. Are there other organizations which receive funding this way?

Subject: RE: Clean Air Agencies grants

Hi Ryan –

Thank you for your note. This is an issue we have had a number of recent conversations about and on which we believe we have a way forward. You are correct that for many years, EPA has funded a grant to facilitate a way for states who choose to pay dues to NACAA to be able to do so without having to pay matching funds. While it is EPA policy to promote competition in the award of assistance agreements to the maximum extent practicable, EPA does have an exemption to the assistance agreement competition policy for awards to co-regulator organizations funded by the STAG categorical appropriation based on the associated program cost authority. To date, NACAA has been the sole co-regulator organization funded under this exemption. As you mentioned, there is now another national state air organization.

Last fall, AAPCA submitted an unsolicited proposal to EPA. OAR consulted with the General Counsel and grants office and determined that: 1) AAPCA's proposal did not meet the criteria for unsolicited grants; but also that 2) it would be defensible for the agency to make awards to two different co-regulator organizations under the exemption to provide states with the same option for paying their dues without a match to either national organization. As has been the case with NACAA, the grant would be funded at levels commensurate with the number of individual states requesting to pay their dues this way.

On May 19, my staff had a productive conference call with Clint Woods, Jason Sloan, and Heath Huddleston from AAPCA to explain why their previous unsolicited proposal was not accepted, and to discuss the process and requirements for resubmitting their workplan and budget proposal to achieve a similar arrangement for paying dues that has existed for

NACAA members. My staff expects to hear back from AAPCA in early June once AAPCA has time to incorporate additional details into their workplan and budget proposal.

We plan to touch base with NACAA to advise them of the potential for an additional award to a national co-regulator organization in the next couple of weeks.

Please let me know if you have any additional questions.

Sarah

Subject: Clean Air Agencies grants

The Agency has long provided funding to the National Assn of Clean Air Agencies off the top of CAA grants which state environmental departments receive. Are there other entities which receive automatic funding off the top of states' grants like the NACAA receives from us?

I know this is a long standing practice which NACAA has received since it was STAPPA, but there are competing non-profits with NACAA at this point and with budget cuts of some kind coming states should have the opportunity to individually choose how they use their grant funding from us and not feel obligated to provide it to any recipient in particular. If states choose to provide dues to NACAA, it should be their call after receiving their grants from us.

Will you let me know how best to accomplish this and to advise NACAA of the change in our practice or arrangement with it?

Thanks

Ryan Jackson

Subject: tomorrow

Due to the Administrator's meetings tomorrow, we will not hold the 8am meeting.

However, per our conversations of compiling a directory of actions, please pick up a copy of the "Outline for the Share Drive" document in my office in the morning. You'll find them on my meeting table. Also attached to it is suggested metrics of what OCFO, OP, and other EPA offices track for GPRA reporting or has tracked in the past which may serve as suggestions for our metrics and dashboard.

Both documents are drafts. I'm eager to get your contributions and thoughts to move forward. This will allow the OPA to have a wealth of information to choose from to highlight each week what EPA is doing. Each action will have some type of economic benefit documented, jobs numbers, or both.

This can also hopefully contribute to the running ticker of accomplishments for the Administrator's remarks and to be highlighted on our website and social media.

Thanks.

From: Hupp, Sydney

Hey everyone, just as an FYI this is a very fluid document right now due to all of the travel and coordination of several different schedules. Advance moves are in blue text. Please let me know if you have any questions.

Thanks!

Sydney Hupp

Chris, per our conversation this morning, please proceed with starting to draft the FR for the solicitation for SAB candidates.

Of course, I will help with identifying those with expertise to help contribute to our agenda.

To also follow up on our conversation, the attached are examples used in this previous Congress of lack of geographic diversity on the SAB from states and state government participants.

I'm hoping to work with you to ensure that we get a good cross section of individuals on the SAB.

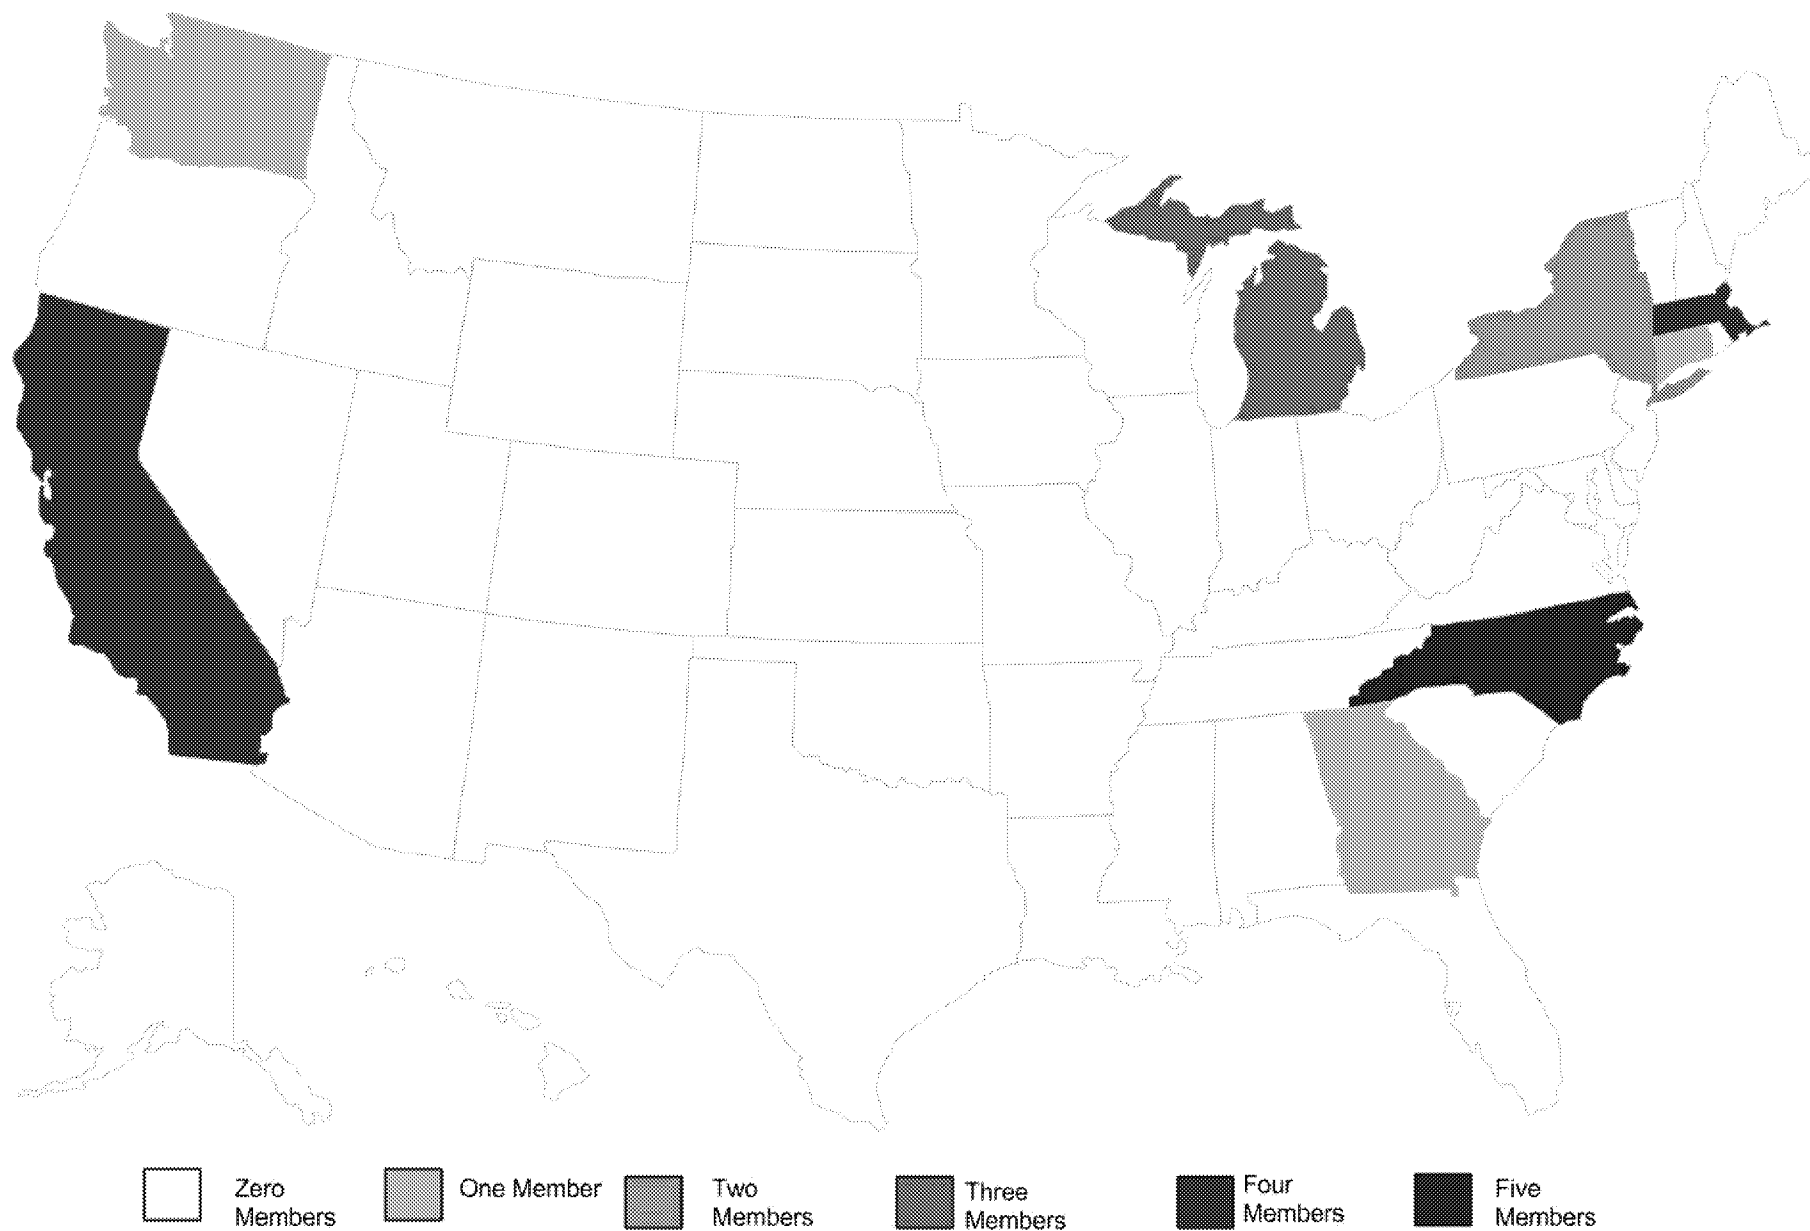

Thanks again for your time today, and again very impressive moose.

Ryan.

Subject: RE: Region 8 Information
Attachments: Real Estate Summary January 2017.xlsx

We received a spreadsheet showing the space costs for a number of the facilities at the regional level including the regional HQs.

However, the costs for region 9 HQ was listed at \$30+ million. That's not correct so I'm trying to get the correct figures. Attached is the example I'm referencing.

My question is can

Ex. 5 - Deliberative Process/Attorney-Client

Ex. 5 - Deliberative Process/Attorney-Client

Additionally, I'm planning to announce other personnel at the 1pm meeting today:

- Jahan Wilcox, strategic communications advisor in OPA
- David Fotouhi, a deputy general counsel
- Liz Bowman, deputy associate administrator for OPA

Are there others for today?

Subject: FW: speeding the signature process

RJ:

I'm sorry to keep coming to the well but we have another problem here. John Reeder and Reggie Allen continue to be obstructionists in terms of delaying everything that needs a signature from Scott Pruitt or from you.

I am trying to get the three people you signed off on to staff our Sector Strategies program and Reggie and John are holding that up and not processing the paperwork because they insist that they need to have a say in this matter, despite my conversation with you and your signature on the documents. I cannot imagine why.

Similarly, where items for the Administrator's signature on rulemakings or notices for the Federal Register would normally come through me and then go to the Administrator's desk after the signature package has been prepared, now John Reeder is holding those and reviewing them, adding an additional step that is delaying signature items for days.

Most recently, the RMP extension got held up in his office for him to review it and I was asked to take it to SP with only minutes to spare before it got to the OFR.

I see no reason why John needs to be an additional layer of approval here and am certain SP would agree – thanks in advance if you can help here.

One last note – I understand this process of John reviewing things is a departure from past practice.

I haven't forgotten.

What if we change the 24 hour door to the north door. The south door was closed today for repair of leaking areas and the guards told me they liked the north door better. Said the AC works better on the north side. I'm pretty much the suggestions box guy.

Ryan,

Attached is the proposed FR notice for the Postponement of Certain Compliance Dates for the Effluent Limitations Guidelines and Standards for the Steam Electric Power Generating Point Source Category.

It is my understanding that the Administrator wants this signed today, so it can be the Federal Register by Tuesday. In order to meet that deadline, it needs to be signed and returned to OFR by 11am today.

Do you authorize autopen?

Thanks.

Derek

Heads-up – This happened last night after 6pm. I asked for an update this morning. Pruitt wants this in the FR by Tuesday... not sure that we'll make this but they'll push it to the OFR this morning.

Subject: OCEFT update

Good afternoon everyone,

As we continue the period of transition, I wanted to share a couple of management changes in OCEFT.

Ex. 6, 7(c) is starting a detail to the Criminal Investigation Division (CID). **Ex. 6, 7(c)** will be supporting CID management in a number of areas including coverage of the National Joint Terrorism Task Force desk EPA holds there. This serves a critical bridge between issues involving national security threats which may have a nexus with our criminal enforcement program.

Pasquale "Nino" Perrotta will be taking on the leadership of the Administrator's Protection

Services Detail (PSD). Nino has served on the PSD since 2005 and was a special agent with the Office of the Inspector General before coming to OCEFT. Prior to joining EPA, Nino served in a number of positions with the United States Secret Service, both domestically and overseas.

Please join me in welcoming both Ex. 6, 7(c) and Nino into their new roles.

Thank you.

Henry

Layne and Robin,
Wanted you to know at the request of House Conference Chair, Congresswoman McMorris-Rogers I asked Don in the pesticide enforcement office to look into a situation the Congresswoman has been trying to resolve since 2009. Apparently a company (or several) that have followed all of the rules and been approved by EPA to sell Wasp and Yellow jacket repellents have repeatedly complained to her office that a company named Black Flag has sold and distributed through Lowes an illegal and not approved by EPA product.
Apparently Home Depot and others have refused to carry the illegal product but Lowes has been carrying it.

Importance: High

1.1 million jobs at risk and cost the industry \$200 billion by 2025 to comply and “no agency has ever set emission limits so far into the future.”

From: David Schwietert [mailto:DSchwietert@autoalliance.org]
Sent: Friday, April 21, 2017 4:25 PM
To: Jackson, Ryan <jackson.ryan@epa.gov>
Subject: re: Auto jobs impacted by EPA Action
Importance: High

Ryan,

Attached is the letter that Mitch Bainwol sent to the Administrator on February 21st requesting that the GHG determination be withdrawn.

With respect to potential job loss caused by the EPA’s Final GHG Determination, page six of the letter to the Administrator noted the following:

We urge EPA to reconsider imposing such a far-reaching mandate on an entire industry without adequately considering the consequences, and without giving stakeholders a meaningful opportunity to comment. The MY 2022-2025 standards threaten to depress an industry that can ill afford spiraling regulatory costs. If left unchanged, those standards could cause up to *1.1 million* Americans to lose jobs due to lost vehicle sales.¹⁵ And low-income households would be hit the hardest.¹⁶

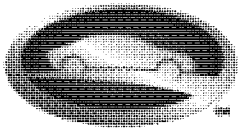

The Alliance is not asking EPA to make a different Final Determination at this time. All we are asking is that EPA withdraw the Final Determination and resume the Midterm Evaluation, in conjunction with NHTSA, consistent with the timetable embodied in EPA’s own regulations. We believe that, if carried out as intended, the Midterm Evaluation can lead to an outcome that makes sense for all affected stakeholders and for society as a whole.

Washington, D.C. 20460

RE: Final Determination on the Appropriateness of the Model Year 2022-2025
Light-Duty Vehicle Greenhouse Gas Emissions Standards under the Midterm
Evaluation

Dear Administrator Pruitt,

I write on behalf of the Alliance of Automobile Manufacturers (Alliance), an association representing twelve leading manufacturers of cars and light trucks,¹ to request that the U.S. Environmental Protection Agency (EPA) withdraw the Final Determination on the Appropriateness of the Model Year 2022-2025 Light-Duty Vehicle Greenhouse Gas Emissions Standards under the Midterm Evaluation (Final Determination) which was announced on January 13, 2017 but never published in the *Federal Register*.

For the auto industry, the Final Determination may be the single most important decision that EPA has made in recent history. The Alliance requests that EPA withdraw the Final Determination and resume the Midterm Evaluation, in accordance with its original timetable, to remedy the severe procedural and substantive defects that have infected the process to date. We explain, in more detail below, EPA's authority to withdraw the Final Determination and why that withdrawal is appropriate and essential.

1. EPA Should Exercise Its Authority to Withdraw the Final Determination

As you know, on January 20, the White House issued a memorandum to the heads of all executive departments and agencies instituting a freeze on regulatory activity, pending review by the Office of Management and Budget (OMB) Director.² The Alliance urges EPA to withdraw the Final Determination on its own initiative in accordance with the regulatory freeze. Irrespective of whether EPA considers the Final Determination a rule or an adjudication, the Final Determination should be reviewed

¹ Alliance members are BMW Group, FCA US LLC, Ford Motor Company, General Motors Company, Jaguar Land Rover, Mazda, Mercedes-Benz USA, Mitsubishi Motors, Porsche Cars North America, Toyota, Volkswagen Group of America, and Volvo Car USA.

² See Memorandum for the Heads of Executive Departments and Agencies, Jan. 20, 2017, <https://www.whitehouse.gov/the-press-office/2017/01/20/memorandum-heads-executive-departments-and-agencies>.

and withdrawn. As the Alliance has noted, a wealth of precedents confirm that the Final Determination is a rule, and all rules not yet published in the *Federal Register* are subject to the regulatory freeze.³ Even if EPA continues to construe the Final Determination as an adjudication, however, it is still subject to the regulatory freeze as an “agency statement of general applicability and future effect ‘that sets forth a policy on a statutory, regulatory, or technical issue or an interpretation of a statutory or regulatory issue.’” The Final Determination reaffirms and reinstates industry-wide greenhouse gas emissions standards for all light vehicles sold in America for MY 2022-2025, and thereby establishes a policy on a regulatory issue of central importance to the auto industry.

Furthermore, EPA has ample authority to withdraw the Final Determination on its own initiative, irrespective of whether EPA considers it a rule or an adjudication. If the Final Determination is a rule, it is clearly a nonfinal one, because it has not been published in the *Federal Register*. See 5 U.S.C. § 553(d); *Kennecott Utah Copper Corp. v. U.S. Dep’t of Interior*, 88 F.3d 1191, 1209 (D.C. Cir. 1996). And, as a nonfinal rule, EPA can readily withdraw the Final Determination without engaging in notice-and-comment rulemaking. *Kennecott*, 88 F.3d at 1206.

Even if EPA continues to endorse the view that the Final Determination is an adjudication, however, EPA has broad inherent power to reconsider its decision “within the period available for taking an appeal.” *Am. Methyl Corp. v. EPA*, 749 F.2d 826, 835 (D.C. Cir. 1984). Agencies have long exercised this power to fix determinations like this one that suffer from “serious procedural and substantive deficiencies.” *Belville Min. Co. v. United States*, 999 F.2d 989, 998 (6th Cir. 1993). Regardless of how EPA classifies the Final Determination, EPA should promptly withdraw it in light of the many procedural and substantive flaws described below.

2. EPA Has Abrogated Its Commitment to a Robust Midterm Evaluation

As the Supreme Court has recognized, EPA’s regulatory efforts to address greenhouse gases have already produced “the single largest expansion in the scope of the [Clean Air Act] in its history.”⁴ In 2009, EPA issued an Endangerment Finding that motor vehicle greenhouse gas emissions contribute to climate change and thereby threaten public health and welfare. Thereafter, EPA and the National Highway Traffic Safety Administration (NHTSA) began jointly setting greenhouse gas emissions and fuel economy standards for new light-duty motor vehicles, starting with Model Year (MY) 2012-2016. Then, in 2012, EPA and NHTSA took the unprecedented step of

³ See Alliance Comments on Proposed Determination on Appropriateness of the Model Year 2022-2025 Light-Duty Vehicle Greenhouse Gas Emissions Standards under the Midterm Evaluation at 11-13, Dec. 30, 2016, Docket ID No. EPA-HQ-OAR-2015-0827; Memorandum for the Heads of Executive Departments and Agencies, Jan. 20, 2017.

⁴ *Utility Air Regulatory Group v. EPA*, 134 S. Ct. 2427, 2436 (2014) (internal quotation marks omitted).

setting joint greenhouse gas and fuel economy standards over a decade in advance for MY 2022-2025 vehicles. 77 Fed. Reg. 62,628 (Oct. 15, 2012). No agency ever had set emissions standards so far into the future, and all stakeholders understood that no one could accurately project the circumstances affecting the technological and economic feasibility of these standards.

The Alliance supported these efforts—but only on the condition that EPA and NHTSA would reassess standards as data became available to test their feasibility. That commitment was essential because of the great uncertainty regarding the feasibility of the future standards. Based on the projections in the 2012 rule, manufacturers must achieve an average 54.5 miles per gallon equivalent across their new vehicle fleets by 2025. Even today, no conventional vehicle today meets that target, and conventional vehicles comprise 96.5% of the new light-duty vehicle fleet. Only some non-conventional vehicles (i.e., hybrid, plug-in electric, and fuel-cell vehicles), which comprise fewer than 3.5% of today’s new vehicles, currently can do so.⁵ Even under EPA’s optimistic estimates, the automotive industry will have to spend a staggering \$200 billion between 2012 and 2025 to comply, making these standards many times more expensive than the Clean Power Plan.⁶

EPA and NHTSA committed to a robust Midterm Evaluation that would take a fresh look at these standards by April 2018. The agencies promised that this review would be collaborative, so that the industry could offer the agencies real-life data to adjust their model-driven forecasts. The agencies also committed to developing greenhouse gas emissions standards and fuel economy standards in tandem.⁷ And they repeatedly represented that they would not complete the Proposed Determination/Notice of Proposed Rulemaking until mid-2017 at the earliest.⁸ The industry took the agencies at their word, commissioning complex studies critical to assessing the MY 2022-2025 standards and the processes used by EPA in its analysis, that we had expected to add to the administrative record for the Midterm Evaluation in 2017.

On November 30, 2016, EPA abruptly abrogated these commitments. EPA issued a Proposed Determination that the MY 2022-2025 standards should go into force

⁵ “Light-Duty Automotive Technology, Carbon Dioxide Emissions, and Fuel Economy Trends: 1975 through 2016,” at 118. U.S. Environmental Protection Agency. EPA-420-R-16-010, Nov. 2016.

⁷ See 40 C.F.R. § 86.1818-12(h), 77 Fed. Reg. 62,784 (Oct. 15, 2012), 40 C.F.R. § 86.1818-12(h)(1)-(2); 81 Fed. Reg. 49,219 (July 27, 2016).

⁸ See Alliance Comments on Proposed Determination at 10, Dec. 30, 2016, Docket ID No. EPA-HQ-OAR-2015-0827.

without modification. EPA issued the Proposed Determination without coordinating with NHTSA. EPA demanded comments by December 30, 2016, even though the Proposed Determination was not published in the *Federal Register* until December 6. The public and industry had a mere 24 days, spanning a major national holiday, to comment on nearly 1,000 pages of documents, plus additional cited documents and computer modeling, regarding requirements that will profoundly affect the automobile industry and the more than 900,000 American workers it directly employs.⁹ After EPA denied requests by various stakeholders to extend the abbreviated comment period, we did our best to file substantive comments. EPA received more than 100,000 public comments, including 63 sets of comments from various organizations spanning hundreds of pages.¹⁰ Many objected that the comment period was inadequate. EPA denied all requests to extend the abbreviated comment period and yet EPA issued the Final Determination on January 13, 2017, just 14 days after the comment period closed. EPA brushed aside objections to its procedural shortcuts and never justified the need for such an abbreviated comment period. EPA also rejected commenters' substantive and technical concerns by resting on its earlier analysis.

3. EPA Should Withdraw the Final Determination Immediately

The Final Determination is the product of egregious procedural and substantive defects and EPA should withdraw it.¹¹ In EPA's rush to promulgate the Final Determination before the new administration took office, EPA bypassed required procedures, failing for instance to provide an adequate period for meaningful notice and comment. The Final Determination asserts that there was no need for more time because the Proposed Determination did not include much new material. But that contention is belied by EPA's acknowledgement that the Proposed Determination adjusted a number of EPA assumptions in response to commenters who pointed out errors at earlier stages. The industry also had an unacceptably short period to try to ascertain why EPA rejected many of its objections.¹² These procedural defects are significant irrespective of whether the Final Determination constitutes rulemaking or adjudication.

EPA's unilateral announcement of its Final Determination also constitutes a failure to harmonize its greenhouse gas emissions standards with NHTSA's fuel-economy standards, contrary to the letter and intent of EPA's own regulations. NHTSA has not yet reached a determination on its fuel economy standards and continues its

⁹ U.S. Department of Labor, Bureau of Labor Statistics, 2015, U.S. Vehicle and Equipment Manufacturing Employment equaled 909,700 people.

¹⁰ Final Determination, Response to Comments at 1-3.

¹¹ See Alliance Comments on Proposed Determination, Dec. 30, 2016, Docket ID No. EPA-HQ-OAR-2015-0827.

¹² See Final Determination, Response to Comments at 7.

Midterm Evaluation rulemaking activities. EPA's failure to act in coordination with NHTSA also casts serious doubt on the legitimacy of EPA's data and conclusions, given the substantial discrepancies between EPA's and NHTSA's analysis of the technologies and costs associated with the MY 2022-2025 standards.¹³

Furthermore, EPA's Final Determination that the MY 2022-2025 greenhouse gas standards should remain unchanged, is riddled with indefensible assumptions, inadequate analysis, and a failure to engage with contrary evidence. Here are just a few examples:

- EPA estimated that these standards will cost the industry at least \$200 billion. But EPA underestimated the burden. Contrary to EPA's assumptions, manufacturers will have to rely on much more expensive electrified technologies (i.e., hybrids and plug-ins), driving up vehicle prices and depressing auto sales.
- EPA refused to conduct an analysis of consumer acceptance and technology affordability needed for compliance, claiming this was too difficult.
- EPA refused to analyze substantively the economic impact of the MY 2022-2025 standards, instead making cursory assertions that downplayed the impact of its mandate on auto sales and employment.
- EPA refused to consider many of the Alliance's technical concerns even when supported by an outside consultant¹⁴, asserted the Alliance provided insufficient data, and then refused further meetings for clarification.

4. Studies and Data Highly Relevant to the Midterm Evaluation Have Not Been Submitted to EPA Because They Still Are Pending

It is particularly critical that EPA withdraw the current Final Determination and reopen the Midterm Evaluation process because analysis commissioned according to EPA's original timetable is ongoing and the Alliance expects that new information relevant to the Final Determination's underlying assumptions and resulting analysis will soon emerge. EPA's rushed timetable, coupled with its about-face on the timing of the Midterm Evaluation, prevented consideration of this information.

¹³ See Alliance Comments on US EPA, US DOT, California's Air Resources Board Draft Technical Assessment Report of Greenhouse Gas Emissions and Fuel Economy Standards for Model Year 2022-2025 Cars and Light Trucks at ES-9, Sept. 26, 2016, Docket ID No. EPA-HQ-OAR-2015-0827, NHTSA's costs are approximately 42% higher than EPA's (NHTSA Table ES-2 v. EPA ES-4 Table ES-1).

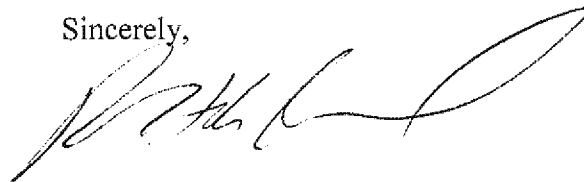

¹⁴ See Novation Analytics Comments on Draft Technical Assessment, Sept. 26, 2016; Docket ID No. EPA-HQ-OAR-2015-0827.

We urge EPA to reconsider imposing such a far-reaching mandate on an entire industry without adequately considering the consequences, and without giving stakeholders a meaningful opportunity to comment. The MY 2022-2025 standards threaten to depress an industry that can ill afford spiraling regulatory costs. If left unchanged, those standards could cause up to *1.1 million* Americans to lose jobs due to lost vehicle sales.¹⁵ And low-income households would be hit the hardest.¹⁶

The Alliance is not asking EPA to make a different Final Determination at this time. All we are asking is that EPA withdraw the Final Determination and resume the Midterm Evaluation, in conjunction with NHTSA, consistent with the timetable embodied in EPA's own regulations. We believe that, if carried out as intended, the Midterm Evaluation can lead to an outcome that makes sense for all affected stakeholders and for society as a whole.

The Alliance welcomes the opportunity for further dialogue about ways to rekindle the industry's longstanding cooperation with EPA on these issues.

Sincerely,

Mitch Bainwol

Subject:

I'm running late in today because I have to take care of a lose end at the Senate which I'm not able to do until disbursing gets there at 9. With my weeks thus far and being out Monday and Tuesday with Pruitt I have to get this done this morning before it gets away from me. Hopefully this doesn't take long.

Ryan Jackson
Chief of Staff
U.S. EPA

Ex. 6
